SUMMARY

Seasoned Software Engineer with 11 years of experience in frontend development and DevOps, seeking a Software Engineer role. Expert in transforming wireframes into responsive applications using HTML5, CSS3, and JavaScript frameworks; adept in agile and DevOps practices. Spearheaded UI development and code reviews, leading cross-functional teams and contributing to high-value projects.

WORK EXPERIENCE

Medscape

New York City

Frontend Engineer

2018 - Present

- Construct and refine 30-40 user interface applications monthly, employing a broad tech stack including HTML5, CSS3, JavaScript, React UI components, and JSP, resulting in the efficient completion of 5,000 team-supported tasks.
- Translate complex designs and wireframes from Sketch, Figma, and Adobe XD into fully responsive desktop and mobile applications, ensuring seamless integration with REST APIs, JSON and React.
- Facilitate collaboration with diverse cross-functional teams, leveraging agile and waterfall methodologies, to streamline project execution and enhance team synergy.
- Lead and mentor a team of eight in-house developers and provide guidance to international counterparts, conducting thorough code reviews and overseeing the quality assurance process.
- Innovate development practices by architecting an ES6 JavaScript toolkit, optimizing SharePoint CI/CD processes, and standardizing a base template for production deployment.

Verisk Analytics

Jersey City, NJ

DevOps

2016 - 2018

- Delivered comprehensive support for CMS templates, modules, and components, optimizing the performance of nine high-traffic websites, including a flagship site attracting 600,000 monthly visitors.
- Utilized JIRA to manage and streamline test, staging, and production processes for a suite of Joomla, WordPress, and HTML5 static sites, enhancing both internal and external web functionalities.
- Developed an intricate application architectural diagram using Microsoft Visio to depict the interactions between various software and hardware systems, facilitating improved understanding and support by Corporate Systems.

Zerve

New York City, NY

Frontend Developer

2013 - 2016

- Developed and integrated e-commerce solutions, including ticketing buttons and SEO metadata, into client websites across multiple CMS platforms like WordPress, Joomla, and Magento.
- Customized WooCommerce, PayPal, and various shopping carts within theme-specific environments to enhance user experience and functionality.
- Consistently achieved monthly conversion targets, generating a minimum of \$5,000 in seller activity revenue through the integration of 20-25 sites.
